

K SCAN AI

Privacy Policy

Website + iOS App Store submission-ready public version

Effective Date: May 13, 2026	Last Updated: May 25, 2026	Contact: kscanai.app@gmail.com
------------------------------	----------------------------	--------------------------------

K Scan AI ("K Scan," "we," "our," or "us") respects your privacy. This Privacy Policy explains how we collect, use, disclose, retain, and protect information when you use our website, mobile application, APIs, AI systems, and related services (collectively, the "Service").

K Scan is a fashion-specific visual discovery and shopping-assistance service. The Service allows users to scan fashion items, upload style inspiration, save items, and receive product matches or retailer links. This Policy applies to both the website and the mobile app unless a separate notice says otherwise.

Privacy Controls Summary

- Your camera is used only when you choose to scan, upload an image, or scan QR/barcode content.
- K Scan is not designed for surveillance, facial recognition, biometric identification, or identifying people.
- Raw scans and uploaded images are not sold to third-party data buyers.
- K Scan does not generate, store, or retain biometric templates, face geometry, faceprints, or identity profiles.
- K Scan is architected for privacy, including a roadmap to implement on-device edge processing that can automatically obscure detected faces and other supported identifying visual elements before cloud processing where technically feasible. During the Beta phase, scan images may be transmitted through secure, encrypted channels for processing.
- K Scan may monetize aggregated, anonymized, or de-identified demand intelligence that does not reasonably identify an individual.
- Optional analytics, advertising, attribution, and tracking technologies are used only where permitted by law and, where required, with consent or App Tracking Transparency permission.
- You may request access, correction, deletion, portability, restriction, or opt-out rights where applicable.
- If you create an account, you may delete your account through the app at Settings > Account > Delete Account.

1. Key Definitions

Personal Information / Personal Data: information that identifies, relates to, describes, can reasonably be linked to, or could reasonably identify an individual or household.

De-identified Data: data processed so it cannot reasonably be linked to an identified person and is subject to controls designed to prevent re-identification.

Aggregated Data: information combined with other data so it does not identify a specific person.

Anonymized Data: data that cannot reasonably be used to identify or re-identify a person.

Raw Scan Data: original camera uploads, image files, screenshots, QR/barcode captures, or other unaltered content submitted for scanning.

Derived Scan Data: metadata or analysis generated from a scan, such as garment category, color, texture, style attributes, product-match signals, or visual-search embeddings.

Commercial and Preference Data: saved items, product interactions, style preferences, shopping activity, affiliate attribution data, product-interest signals, and fashion-related preferences.

Aggregated Demand Intelligence: aggregated, anonymized, or de-identified market, product, style, trend, scan, retailer, conversion, or demand insights that do not reasonably identify an individual.

2. Information We Collect

A. Information You Provide

- Name, if provided voluntarily
- Email address, including for waitlist signup, beta access, support, account creation, or marketing communications
- Account credentials, where applicable
- Messages, support inquiries, feedback, investor inquiries, or other communications
- Style preferences, saved items, shopping preferences, or profile settings you choose to provide

B. Social Login and Profile Information

If you sign in or interact through a third-party provider such as Google Sign-In, Sign in with Apple, or another social login provider, we may receive limited profile information such as your name, email address, profile identifier, username, and publicly available profile information, depending on your settings and the provider's rules.

We use this information to authenticate users, operate the Service, provide account support, personalize the Service, and comply with legal obligations.

If you use Sign in with Apple, you receive the same account, privacy, deletion, and data-rights protections as users who sign in through any other method.

C. Camera, Scan, Image, QR, Barcode, and Visual Data

When you choose to use K Scan's camera, upload an image, scan a screenshot, or scan QR/barcode content, we may process the image or scan input to identify fashion items, product identifiers, style signals, QR/barcode content, text, URLs, or related product matches.

Camera access is activated only when you intentionally initiate a scan, capture, upload, or QR/barcode action. K Scan does not use the camera for background surveillance or continuous monitoring.

Processing may occur locally on your device and/or through secure cloud systems when needed to deliver the Service.

Raw uploaded scans and images are not sold, licensed, or disclosed to third-party data buyers for independent commercial reuse.

We do not use scan data for facial recognition or to identify individuals.

K Scan is not designed to identify people in public spaces. If an image incidentally includes a person, bystander, face, license plate, or other identifying element, K Scan is architected for privacy, including a roadmap to implement on-device edge processing that can automatically obscure detected faces and other supported identifying visual elements before cloud processing where technically feasible. During the Beta phase, scan images may be transmitted through secure, encrypted channels for processing. K Scan does not use facial, biometric, depth, or bystander-derived data for identity verification, advertising, or demand-intelligence products.

QR/barcode content is used to return scan results, support security, diagnose functionality, prevent fraud, and improve the Service. QR/barcode content may be logged only where necessary for diagnostics, fraud prevention, or functionality.

D. Sensitive or Special Category Information in Uploaded Visuals

K Scan is not designed to collect sensitive personal information or special category data through scans. However, uploaded or captured images may incidentally reveal sensitive traits, such as health-related appearance, religious attire, disability-related indicators, approximate age, body characteristics, or other personal attributes.

We do not intentionally use or monetize sensitive visual information. We do not use the Service to infer race, religion, health status, sexuality, disability, precise age, or other protected traits for advertising, eligibility, or identity profiling.

Where applicable law requires explicit consent or enhanced safeguards for processing sensitive or special category data, we will obtain that consent or avoid the processing.

E. Voice and Microphone Data

The initial iOS release of K Scan does not request microphone permission and does not collect voice, microphone, speech-recognition, raw audio, or voiceprint data.

If K Scan introduces voice search, wake phrases, microphone access, or speech recognition in a future release, we will update this Policy, add the required iOS permission disclosures, and request any required consent before collecting or processing voice or audio data.

F. Automatically Collected Information

- Device type, operating system, browser information, and app version
- IP address and approximate location derived from technical data
- App interactions, session data, log data, diagnostics, and performance information
- Device identifiers
- Advertising identifiers, such as IDFA, only where permitted by your device settings, applicable law, and Apple's App Tracking Transparency framework
- Marketing engagement data, including email opens, clicks, campaign attribution, referral source information, and app-install attribution data

G. Purchase, Affiliate, and Retailer Interaction Data

K Scan may collect information about product interactions, saved items, outbound retailer clicks, affiliate attribution, referral links, price alerts, product categories, and commerce-related activity.

K Scan does not process payment card information unless paid features are introduced and payment processing is required. If paid digital features are offered through the iOS app, applicable Apple payment rules will be followed.

3. How We Use Information

- Provide, operate, maintain, secure, and improve the Service
- Process scans and generate fashion-related, commerce-related, or visual-search results
- Personalize product results, recommendations, content, style boards, and user experience
- Save items, maintain scan history, provide price alerts, and support account functionality
- Send welcome emails, beta invitations, product updates, service notifications, support messages, and marketing communications
- Measure advertising, affiliate attribution, campaign performance, and product engagement where permitted
- Analyze usage trends and improve AI systems
- Detect fraud, prevent misuse, protect users, and enforce legal terms
- Comply with legal obligations and respond to lawful requests
- Create aggregated, anonymized, or de-identified insights that do not identify you

4. Data Sharing, Commercial Use, and Data Monetization

K Scan's business model may include affiliate commerce, retailer attribution, campaign measurement, advertising measurement, product analytics, aggregated demand intelligence, commercial trend insights, and other privacy-controlled data products.

K Scan does not sell or license raw scans, uploaded images, biometric identifiers, face templates, facial recognition data, payment card data, government identification, or sensitive personal information to third parties for independent use.

K Scan may share limited non-sensitive information, commercial interaction data, attribution data, preference signals, analytics data, inferred fashion interests, product-interest signals, or related information with retail, affiliate, commerce, advertising, analytics, attribution, or marketing partners where permitted by law, subject to applicable consent, opt-out rights, contractual restrictions, platform rules, and user privacy controls.

Where an activity constitutes tracking under Apple's App Tracking Transparency framework, K Scan will request ATT permission before engaging in that activity.

Where an activity constitutes sale, sharing, targeted advertising, or similar regulated processing under applicable privacy laws, K Scan will provide required notices, consent mechanisms, opt-out rights, and legally required controls.

K Scan's commercial data practices are designed to preserve the distinction between protected scan content, user-level operational data, and aggregated, anonymized, or de-identified demand intelligence.

4.1 Protected Data We Do Not Sell or License for Independent Third-Party Use

- Raw scans
- Uploaded images
- Biometric identifiers
- Face templates or face geometry
- Facial recognition data
- Payment card data
- Government identification
- Sensitive visual traits
- Personal information of children where prohibited by law

K Scan does not use scan data to identify individuals, perform facial recognition, verify identity, or create biometric profiles.

4.2 Service Providers

K Scan may share information with service providers that perform services on our behalf, such as cloud hosting, infrastructure, analytics, email delivery, customer support, security, fraud prevention, performance monitoring, crash reporting, and app operations.

These service providers may use the information only to provide services to K Scan and must protect the information consistent with applicable law and contractual obligations.

4.3 Retail, Affiliate, Commerce, and Attribution Partners

K Scan may share limited information with retail, affiliate, commerce, and attribution partners to route users to product results, measure affiliate conversions, confirm referral activity, attribute purchases or clicks, prevent fraud, support campaign reporting, improve product relevance, and support retailer and partner analytics.

This information may include technical referral data, click data, product interaction data, campaign identifiers, transaction attribution data, approximate location, device or browser information, and limited account or identifier data where permitted.

K Scan does not provide raw scans, biometric data, facial recognition data, or uploaded images to retailers or affiliate partners for independent reuse.

K Scan maintains contractual restrictions designed to prohibit partners from re-identifying de-identified data or using data in ways inconsistent with this Policy and applicable law.

4.4 Advertising, Analytics, and Marketing Partners

K Scan will request App Tracking Transparency permission before any activity that constitutes tracking under Apple's framework.

Subject to applicable law, platform rules, consent, opt-out rights, and ATT permission where required, K Scan may share limited identifiers, usage data, advertising data, attribution data, commercial interaction data, preference data, or inferred fashion-interest data with advertising, analytics, attribution, and marketing partners.

These activities may support campaign measurement, ad performance analysis, partner reporting, referral attribution, fraud prevention, audience measurement, personalization, advertising effectiveness, and marketing optimization.

You may decline tracking without losing access to the core camera-search functionality of the Service.

4.5 Aggregated, Anonymized, and De-identified Demand Intelligence

K Scan may create, use, disclose, license, sell, or commercialize aggregated, anonymized, or de-identified data and insights that do not reasonably identify an individual.

These insights may include fashion trend signals, product demand patterns, scan-volume trends, category interest data, style-preference trends, geography-level demand signals at city-level or broader aggregation, retailer performance insights, product-match and conversion analytics, anonymized market research, and aggregated commercial intelligence. K Scan will use geography-level or category-level reporting only where the combination of geography, fashion category, and other attributes does not reasonably permit re-identification.

For example, K Scan may provide a retailer or brand with an insight such as: "black cropped leather jackets are trending among users in major urban markets this month." K Scan will not provide that retailer with raw user scans, facial data, biometric identifiers, or individual user identities as part of this aggregated insight product.

Aggregated, anonymized, or de-identified data may be retained indefinitely and used for product improvement, market analysis, business reporting, retailer insights, partner analytics, and demand-intelligence products, provided it cannot reasonably identify you.

K Scan maintains technical, organizational, and contractual controls designed to prevent re-identification of de-identified or aggregated demand-intelligence data.

4.6 Commercial and Preference Data

K Scan may use commercial and preference data to personalize the Service, improve product results, generate recommendations, measure affiliate attribution, support commerce routing, and create privacy-controlled commercial insights.

Commercial and preference data may include saved items, product interactions, scan-result clicks, retailer clicks, style preferences, fashion categories of interest, price-alert activity, search and scan history, affiliate attribution data, product affinity signals, and inferred fashion interests.

Depending on applicable law, jurisdiction, user choices, and the nature of the data processing, some disclosures of this information may be considered sale, sharing, targeted advertising, or similar regulated processing. Where required, K Scan will provide opt-out rights, consent mechanisms, or other legally required controls.

4.7 California Sale / Sharing Notice

Some privacy laws, including California privacy law, define sale and sharing broadly. Certain analytics, advertising, affiliate attribution, campaign measurement, partner reporting, or commercial data activities described in this Policy may be considered a sale or sharing of personal information under those laws.

California residents and residents of jurisdictions with similar opt-out rights may opt out of sale or sharing where required by law through the in-app privacy settings, through any legally required privacy-control mechanism we make available, or by contacting kscanai.app@gmail.com.

K Scan honors Global Privacy Control signals where required by applicable law.

4.8 User Controls

- Opt out of sale or sharing
- Decline App Tracking Transparency permission
- Limit advertising identifiers through device settings
- Opt out of marketing emails
- Request deletion of personal information
- Delete your account in the app via Settings > Account > Delete Account
- Limit optional personalization
- Withdraw consent where processing is based on consent

You may contact us at kscanai.app@gmail.com for privacy requests or questions.

5. App Tracking Transparency, Cookies, Analytics, Advertising, and Tracking

K Scan may use cookies, pixels, SDKs, device identifiers, attribution tools, analytics platforms, advertising platforms, affiliate tracking technologies, and marketing services to operate the Service, understand usage, measure campaigns, personalize experiences, prevent fraud, support retailer attribution, and support commercial partnerships.

K Scan uses analytics, attribution, and affiliate-measurement tools in a privacy-controlled manner. Some measurement may be limited to first-party analytics or referral reporting and may not constitute tracking under Apple's rules.

If K Scan or any integrated third-party SDK links data from this app with data from other companies' apps, websites, or offline properties for targeted advertising or advertising-measurement purposes, K Scan will first present Apple's App Tracking Transparency prompt and will not enable that activity unless you authorize tracking.

You may allow or deny tracking. Denying tracking will not prevent you from using the core camera-search functionality of the Service, although optional personalization, advertising, attribution, or partner-supported experiences may be affected.

You may also manage tracking and advertising preferences through device settings, app permissions, browser controls, cookie settings, advertising ID controls, App Tracking Transparency settings, Global Privacy Control where required, and legally required opt-out mechanisms.

Where required by law, non-essential analytics, advertising, and marketing cookies or SDKs are used only after valid consent.

We currently do not respond to traditional Do Not Track browser signals. Where required by applicable law, we honor Global Privacy Control signals as opt-out requests for sale or sharing.

6. Third-Party SDKs, Vendors, and Processors

K Scan may use third-party vendors, SDKs, or processors to support app functionality, analytics, crash reporting, cloud processing, authentication, email delivery, affiliate attribution, security, fraud prevention, customer support, and marketing.

The categories of third-party services may include cloud hosting and infrastructure providers, authentication providers, analytics and diagnostics providers, crash reporting and performance monitoring tools, email and customer-support providers, affiliate networks and retailer attribution partners, advertising and campaign-measurement providers, and payment processors if paid features are introduced.

The categories of data collected, whether that data is linked to you, and whether it is used for tracking will depend on the SDKs and data flows included in the applicable app version. K Scan will make required platform privacy disclosures for the applicable app version and will update those disclosures if the SDK mix or data flows change.

K Scan requires service providers and partners to handle user data consistently with this Policy and applicable law.

7. Data Retention

We retain information only as long as reasonably necessary for the purposes described in this Policy, unless a longer period is required or permitted by law.

- Account and contact data: for the duration of the relationship plus up to 24 months, unless a shorter or longer period is required by law or requested deletion applies.
- Support and communications data: up to 24 months after resolution.
- Usage, analytics, and marketing data: up to 24 months, unless retained in aggregated, anonymized, or de-identified form.
- Raw scan data: typically processed transiently and deleted within 24–72 hours unless saved by the user, required for functionality, required for security, needed to troubleshoot a user-requested issue, or legally required.
- Saved items, scan history, style boards, and user preferences: retained while your account is active or until you delete them.
- Aggregated, anonymized, or de-identified data: may be retained indefinitely for research, analytics, commercial insights, product improvement, trend analysis, business reporting, and demand-intelligence products, provided it cannot reasonably identify you.

8. Your Privacy Choices and Requests

Depending on your location, you may request access, correction, deletion, portability, restriction, objection, or withdrawal of consent for certain personal information.

You may opt out of marketing emails using the unsubscribe link or by contacting us at kscanai.app@gmail.com.

You may limit tracking through device settings, app permissions, browser controls, cookie settings, advertising ID controls, App Tracking Transparency settings, Global Privacy Control where required, and legally required opt-out mechanisms.

You may opt out of sale or sharing of personal information where required by law by using the in-app privacy settings, by using any legally required privacy-control mechanism we make available, or by contacting us at kscanai.app@gmail.com.

Exercising privacy rights will not result in unlawful discrimination or denial of the core Service, although certain optional personalized, advertising-related, or partner-supported experiences may change.

9. Account Deletion

Where K Scan supports account creation, you may delete your K Scan account and associated personal information at any time through the in-app Settings menu under Account > Delete Account.

This option is available regardless of whether you created your account via email, Sign in with Apple, Google Sign-In, or any other supported authentication method.

When you delete your account, K Scan will revoke or disconnect related Sign in with Apple tokens where applicable and handle the account under the same deletion and retention rules that apply to other login methods.

Upon account deletion, your profile, saved items, scan history, preferences, and contact information will be permanently deleted within 30 days, except where retention is legally required or permitted for security, fraud prevention, legal compliance, dispute resolution, tax, accounting, or other legitimate purposes. The deletion flow is intended to delete the full account record, not merely deactivate the account.

Raw scan data associated with your account will be deleted in accordance with our standard retention period, typically 24–72 hours, unless saved by you, required for functionality, required for security, needed to troubleshoot a user-requested issue, or legally required.

Aggregated, anonymized, or de-identified data that cannot reasonably be linked back to you may be retained.

You may also contact us at kscanai.app@gmail.com for deletion assistance.

10. Deletion Requests and Downstream Recipients

Where required by applicable law, if we receive and verify a deletion request, we will delete or de-identify covered personal information and notify relevant service providers, contractors, and third parties to whom we disclosed, sold, or shared that information so they can take corresponding action, unless an exception applies or the law does not require further notice.

We may retain information where legally permitted for security, fraud prevention, legal compliance, dispute resolution, accounting, tax, safety, or other allowed purposes.

11. California Privacy Rights

California residents may have rights under the California Consumer Privacy Act and California Privacy Rights Act, including the right to know, access, delete, correct, opt out of sale or sharing, limit use of sensitive personal information where applicable, and avoid discrimination for exercising privacy rights.

K Scan does not sell raw scans, uploaded images, biometric data, payment card data, government identification, or sensitive personal information.

Some advertising, analytics, affiliate attribution, or marketing activities may be considered sharing or sale under California law depending on the data flow and the nature of the data processing. Where required, you may opt out by using the in-app privacy settings, using any legally required privacy-control mechanism we make available, or contacting kscanai.app@gmail.com.

Global Privacy Control is honored where required by applicable law. Authorized agents are accepted where legally permitted, subject to verification. We will respond to verified consumer requests within 45 days, extendable by another 45 days where permitted by law.

12. GDPR / UK GDPR Rights and Legal Bases

If you are located in the European Economic Area, United Kingdom, or another jurisdiction with similar rights, you may have the right to access, correct, delete, restrict, object to processing, request portability, withdraw consent, and lodge a complaint with a supervisory authority.

Possible legal bases include contract performance for core service delivery, consent where required for optional analytics, marketing, tracking, cookies, or targeted advertising, legitimate interests for security, fraud prevention, diagnostics, service improvement, and limited affiliate attribution where lawful, and legal obligations for compliance and lawful requests.

Where consent is required, it will be requested separately from acceptance of Terms, presented in a reasonably granular manner, and may be withdrawn at any time. Withdrawal does not affect processing already completed lawfully before withdrawal, but it may reduce optional personalized, marketing, or partner-supported features.

13. International Data Transfers

Your information may be processed in the United States and other countries. Where required, we use appropriate safeguards such as Standard Contractual Clauses approved by the European Commission, the UK International Data Transfer Addendum, or other lawful transfer mechanisms.

14. Security

We implement reasonable administrative, technical, and organizational safeguards designed to protect information, including encryption in transit where appropriate, access controls, secure infrastructure, data minimization, and retention controls.

No system can be guaranteed completely secure.

15. Children's Privacy

The Service is not directed to children under 13 where U.S. federal law applies.

The Service is intended for users aged 13 and older. Users under 13 may not use the Service unless verifiable parental consent is obtained where required by law. Users under the age of majority should use the Service only with permission from a parent or legal guardian where required by applicable law.

We do not knowingly collect personal information from children under 13 without required consent. We do not knowingly sell or share personal information of minors under 16 without required authorization.

If we learn that we collected personal information from a child without required consent, we will take reasonable steps to delete it. Where feasible, we will delete such information within 10 business days after confirming the issue, unless a longer period is required for legal, safety, or technical reasons.

16. AI, Recommendations, and Automated Results

K Scan uses AI and automated systems to identify fashion items, extract product attributes, generate style signals, rank product matches, and personalize results.

AI-generated results may be incomplete, inaccurate, unavailable, or based on similar rather than exact matches. K Scan does not guarantee that any product match, price, availability, retailer listing, style attribute, or recommendation is complete or error-free.

K Scan does not use AI systems to identify people, perform facial recognition, generate biometric profiles, or make decisions about eligibility for employment, housing, credit, health care, insurance, or other legally significant opportunities.

Where human review is used to troubleshoot errors, improve quality, review abuse, or support users, K Scan will limit review to the minimum information reasonably necessary and will avoid reviewing raw scan content unless needed for support, safety, debugging, or legally required purposes.

17. Third-Party Links and Retailers

The Service may link to third-party retailers, websites, platforms, affiliate partners, or services.

K Scan is not responsible for third-party privacy practices, content, security, pricing, product availability, shipping, returns, payment processing, or policies.

When you leave K Scan and visit a retailer or third-party website, that third party's privacy policy and terms apply.

18. Payments and Paid Features

If K Scan introduces paid digital features, subscriptions, premium AI features, scan quotas, or account upgrades in the iOS app, those features will be offered in accordance with Apple's applicable payment rules.

Retailer links for physical goods may route users to third-party retailer websites or apps. K Scan does not process payment card data for purchases completed directly with third-party retailers.

19. Changes to This Policy

We may update this Privacy Policy from time to time.

For material changes that expand how personal information may be used, disclosed, shared, or processed, we will provide additional notice where required and obtain consent or other authorization when applicable.

We will update the Last Updated date above when changes are made.
